

## 2021 Member Survey – Member comments re course needs

- 13 Fairway and forward teebox for 12 & 14 need work
- Fairways in places are unfairly 'potholed'
- 1 - Clubhouse (brand new) 2 - Course improvements as outlined subject to finances. When improvements made no assessment for current members as general public, future members have to provide funding.
- Create new tee box adjacent to white tee on 17 that can be used as a black tee for #3. Lessen the bottleneck created by people going for the green
- Continue upgrades without accruing high debt load. Improve course conditions before spending millions on clubhouse renos
- Fairways seem to be getting worse (undulations, etc)
- Forward tee boxes on 12 & 18 should be made to accommodate multiple tees
- Improve the 13th landing area. Remove the domed 13th & 17th greens
- Would be awesome to have new fairways. We sometimes call them 'unfairways' !
- The 17th green is urgent and in need of replacement and then 13 and 14.
- Fix Fairways
- The fairways on 13 and 14 are in poor condition due to the collapsing of the old forest lumber that was used as fill in the early staging of design of the course
- Fairway improvement #12
- As mentioned the course is still in need of upgrading deteriorating greens and fairways
- I think the tee boxes are generally of poor quality. Way too many divots and the grass seems to struggle to grow. Replacement of the old greens is a very high priority. #17 is an unfair green
- I think the fairway holes should be filled. Not the undulations as they add uniqueness to the course. The holes come into play occasionally but cutting the grass seems to be impossible. They are also unsightly.
- Surely the fairway on 1 is more priority than 14 ?
- There are other fwy's that could be improved, 2, 9 and 10. There are significant moguls on these fairways

- If changes are made to 13, 14 and 17 greens, we need tee boxes to be moved back from the blues and blacks , otherwise the course has little defense.
- This is the highest priority for me and included fwy's on 13,14 and 17, green redesign (esp 14 & 17) and better irrigation. Green aprons of different and unpredictable softness frustrating.
- Sinkholes on fairways need to be levelled
- Some fairways need improvement
- Please redesign the 17th green and smooth out some of the bumpy fairways
- I would like to see improvements on the fairways before the greens
- The bumpiness of 13 and 17 specifically are less than ideal along with the 17th green. If investments were made I would prioritize there.
- I suggest that redesign and replacement of the listed greens should have priority
- Fairway improvements #2, green improvements #2
- Tee boxes have been pretty poor now for several years, the 8th being one of the worst. Certain boxes should be closed for the majority of the time to enable growth and repair.
- Careful planning and caution to be exercised in all considered changes. This course is a gem
- 17th green gets the most feedback from my guests.
- I believe the needed improvements on the Clubhouse as well as Fairways and greens need to be done one at a time i.e. Clubhouse first or fwys and greens. Of course the fairways and greens would have to be done one at a time to keep the course open.
- Rebuild 13 and 17 greens and level off 13,14 and 17 fairways
- There are far too many seriously sunken areas in thee fairways. All of the areas that re marked as GUR in tournaments should be fix over the next few years.
- Smooth out some of the larger dips on the course
- fix sloped tee boxes, few more trees could be cut back
- We need to find a way to perhaps find some tee boxes so that you don't find sharing of tees, especially where the tee boxes are situated in shady areas.
- Fix fairways

- Overall the course is a wonderful facility, not sure if we need to close down the whole back 9 to improve the course. With some careful planning and strategic design I think its possible to make changes without too much disruption to general play for the membership
- Fixing bumps on 12 fairway
- Bumpy fairways need to be dealt with
- Moguls and open holes on fairways
- Some back 9 greens need to be changed ( 14, 17 & 18 in particular)
- Some fairways could be a little better. Theres some dips and low spots where it could be a touch flatter on a few holes
- I thinks something needs to be done about the 8th tee box and many of the bunkers
- You have identified the right priorities on fairways and greens. Put up a net on #10.
- A few tees need significant TLC
- Fairway 13 is impossible to get a good lie
- Move # 17 back and to the right. Might also help with balls going on to Mamquam.
- The fairways need smoothing out on lots of holes, balls end up in uncut parts of fairway, wet spots, holes and sometime your stance is like a crooked stick man.
- 13th and 17th green need help
- Tee boxes need a lot of work. Be nice to get rid of the bumps and flatten out the fairways to get more consistent lies
- Having a 'back' tee on #3 such that going for the green is not an option. Will speed up play.
- The white/red/green tee box on 14 could be better located down below, where they set it up for 'temporary' purposes.
- Close a hole a year to completely overhaul 13,14 & 17
- New black tee on 3 and new black tee on 14 and fill holes in the fairways.
- Some of the fairways are lumpy. You can get some bad lies from a good shot. Maybe some leveling could be done.
- Some of the teeing areas could be made a bit larger
- Regardless of the 13th, 14th and 17th fairways, wherever there are deep dips and holes in a fairway (or in the rough) they should be filled in or evened out with the surrounding ground. We should never have the best drive of the day and the worst lie of the day on the same shot

- The fairways that are sinking need to be levelled out
- Modify fairways on 13 & 17
- Limit the number of new members and bite the bullet and do major reno to the old fwys and old greens all at once
- complete renovation of the 13th fairway and renovation of green and fwy on 17
- Greens on 13 & 17 taking priority
- Course improvement projects prior to clubhouse improvements as that has been the main focus
- Replacing the 17th green !
- Change flags, smooth out fairways , fix booking time to a reasonable time.
- Would like to see the fairways on 13,14 & 17 improved
- 13th and 17th greens
- Fairways on 13 and 17 ....green on 17. 3 most important in my opinion
- Alter those fairways that are not smoothly flat in landing areas
- Fairways 13,14 and 17. Greens 14&17, irrigation system, improved chipping area
- 17 fairway and green, 13 fairway and green, 14 fairway and green
- Number 17 green should be a priority to be replaced
- Fairways and greens on back 9
- fairway maintenance and tee box upgrades
- work on worst of the fairways
- fairways, greens clubhouse..in that order
- Green replacement on greens mentioned
- fixing tee boxes
- Improve some of our landing areas on 1 fairway and 13 fairway. Replace #17
